

UNITY TRAINING QUICK REFERENCE GUIDE

UNITY GO-LIVE: MAY 2021

UNITY TRAINING SITE VS. TALENT LMS

The [UNITY Training Site](#) is an interactive virtual environment where learners can test new skills without impacting the live site. It is available 24/7.

[ICJ.Talent LMS](#) is a platform to provide guidance and tutorials on how to use the UNITY system.

There is no set time limit and advance reservations are not required on either.

TRAINING RESOURCES

The [UNITY Training Toolkit](#) provides information on how to use the UNITY Training Site and scenarios for states to use to guide learners through different processes.

The UNITY User Manuals include "how-to" information and step-by-step screenshots. The manuals are accessible through the UNITY Training Site.

Additional components will be released in the weeks that follow one topic at a time. This design is intended to promote progressive learning.

DATA

In order to protect juvenile confidentiality, data will not be migrated from JIDS to the Training Site.

Learners will create and work with fictional juveniles and cases. Sample scenarios will be provided in the Training Toolkit. Fictional Sample Documents will also be provided, so that they may be uploaded as needed.

COUNTER ACCOUNTS

Each state/territory has a designated "counter account" to conduct trainings.

This allows users to work through cases as both the Sending and Receiving State without having to coordinate with another state.

JPOs, JPSs, and ICJOs will log into the UNITY Training Site using their own specific roles.

"ALL PROGRESS TAKES PLACE OUTSIDE THE COMFORT ZONE."
